Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 17-19 are, drawn to an apparatus, classified in class 452, subclass 46.
- II. Claims 12-16 and 20 are, drawn to a method of casing of any kind a clip, classified in class 53, subclass 570.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process of applying a clip of any kind can be practiced by hand and a heat seal linking means can be used to fuse the casing at designated link lengths. As a result, the restriction is considered to be proper. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Richard Hoffman on December 09, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
